

# Innovation and Commercialization for a Regional Energy Workforce

The I-CREW project aims to expand the green energy initiative in New Mexico and improve the economic and environmental performance of all businesses within the state, as well as progress New Mexico and its residents to 100% emission free energy.

## **Our Method:**

- Educate individuals and businesses in the aspects, practices and benefits of green energy.
- Job training for the new jobs that will emerge as the renewable energy industry in New Mexico grows.
- Improve environmental performance of businesses.

## **Our Members:**

- New Mexico State University
  - Engineering New Mexico Resource Network
  - Klipsch School of Electrical and Computer Engineering
  - [Indian Resources Development](#)
  - Arrowhead Center
- North American Intelligent Manufacturing Initiative (NAIMI)

## **Environmental-Energy-Economic Assessments:**

- Our personnel study and recommend improvements to businesses, at no cost to the business.
- Find ways to reduce operating costs; such as reducing electricity bills.
- Provide on-site assistance when implementing changes.

## **Address:**

New Mexico State University  
P.O. Box 30001

Las Cruces, NM 88003-8001

Telephone: 575-646-2913
